CAREER OBJECTIVE

Motivated BCA graduate with strong skills in Python, Streamlit, Machine Learning, and Retrieval-Augmented Generation (RAG). Developed AI projects including a Fabric Defect Detection System using YOLO and a PDF Chatbot using Streamlit, ChromaDB, Ollama , and BGE Embeddings. Seeking an internship opportunity to apply technical skills, gain practical experience, and contribute to organizational growth.

EDUCATION

Bachelor of Computer Applications (BCA)

CGPA 8.04

Srinivas University

2023-2026

HIGHER SECONDARY EDUCATION (12th)

Percentage:78%

GHSS CHERKALA

2021-2023

SECONDARY EDUCATION(10TH)

percentage:100%

P.B.M English Medium school

2020-2021

ACADEMIC PROJECT

Fabric Defect Detection System Using YOLO

Developed an AI-based Fabric Defect Detection System using the YOLO model to identify defects in fabric images accurately. The project involved image annotation and model training using labeled datasets to improve defect detection performance. A custom dataset was trained and validated using Kaggle, and a user-friendly interface was built using Streamlit for image upload and defect prediction. Technologies used in the project include Python, YOLO, LabelImg, Kaggle, and Streamlit.

PDF Chatbot Using RAG

Developed an AI-powered PDF Chatbot using Python, Streamlit, ChromaDB, Ollama , and BGE Embeddings. Implemented Retrieval-Augmented Generation (RAG) to answer user questions accurately from uploaded PDF documents. Built a user-friendly interface for PDF upload and real-time question answering using semantic search and vector embeddings.

TECHNICAL SKILLS	STRENGTHS
- Python - C Programming - HTML, CSS - Machine Learning Basic - YOLO Model - Streamlit	- Quick learner - Problem solving skills - Teamwork - Time management
LANGUAGES KNOWN	
- English - Malayalam
